## DOWNLOADING AND PREPARATION OF INSTALLATION FILE

### DOWNLOADING OF INSTALLATION FILE

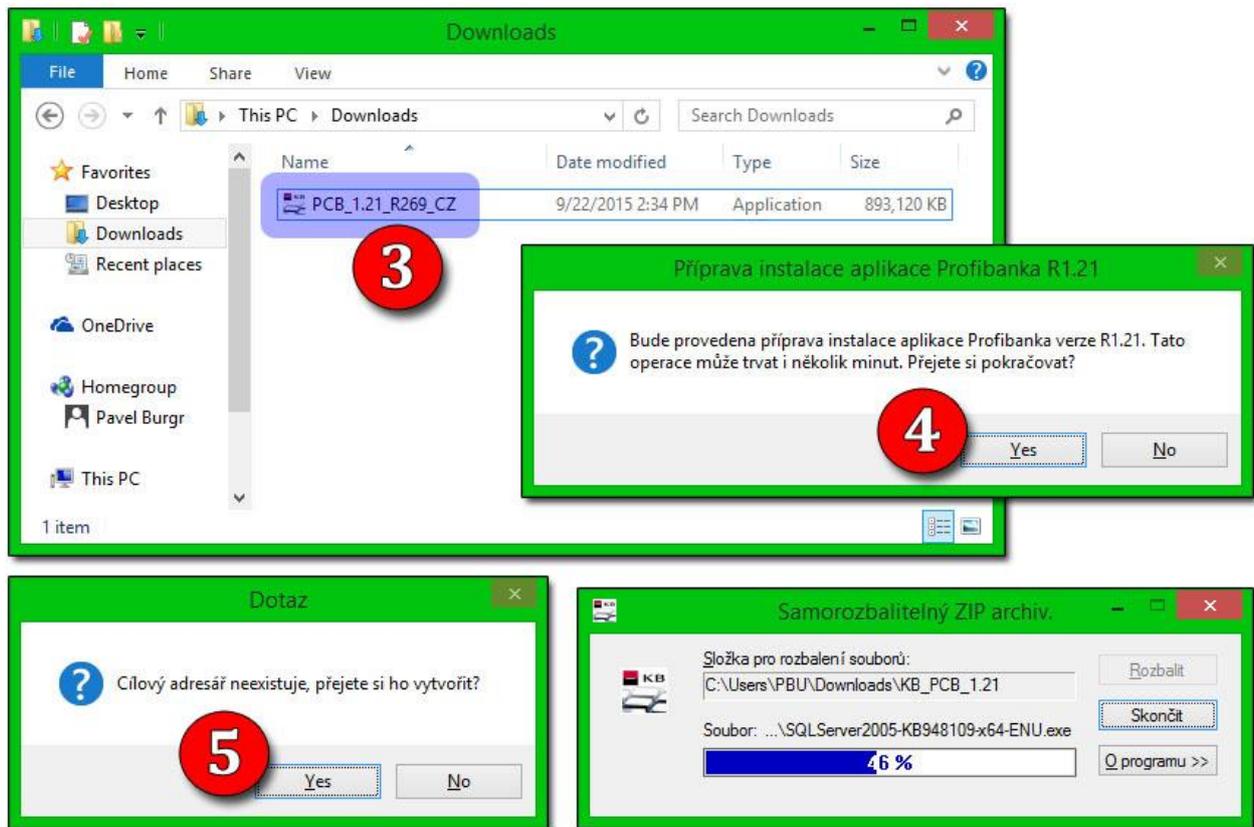

1. Use the link [https://pcb.kb.cz/pcb/download/PCB\\_1.23\\_R312\\_CZ.exe](https://pcb.kb.cz/pcb/download/PCB_1.23_R312_CZ.exe) to download installation package into your computer. In case of a security warning appears, please click on Allow / Yes (etc.) to continue with the download.
2. In case of any request to run / save file please select option **Save / Save file** etc.

Most likely the installation file will be saved into the folder:  
C:\Users\“USERNAME”\Downloads\

**PREPARATION OF INSTALLATION - EXTRACTING**

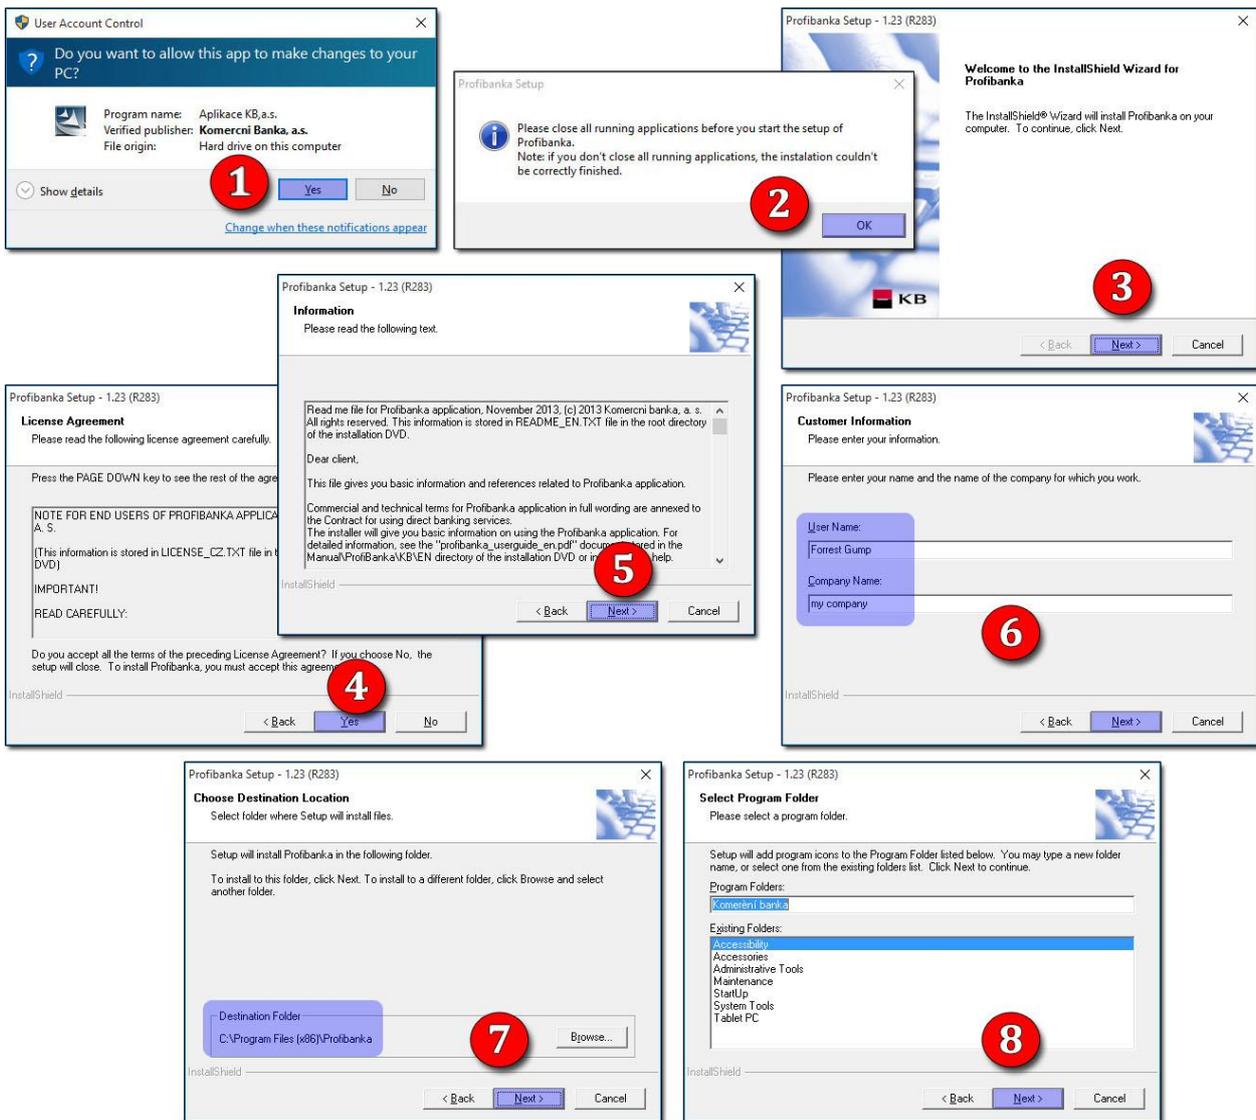

3. Please open downloaded file: **PCB\_1.23\_Rnnn\_CZ.exe**
4. Click on **YES** to agree with the installation
5. Click on **YES** to agree with creation of folder and wait for the end of extraction.

 When extraction is finished the installation of Profibanka should start automatically. If not please open the folder which was created during extraction and run the file: **setup.exe** to start installation manually.

## INSTALLATION

1. Admin right are required. In case of „User account control“ message please click on Yes button
2. On the next screen please click on **OK**
3. On the next screen please click on **Next**
4. Confirm license agreement with **Yes**
5. On the next screen please click on **Next**
6. Enter your name and the name of company and click on **Next**
7. Confirm installation folder with button Next
8. On the next screen please click on **Next**

The screenshots show the following steps:

1. User Account Control dialog box: "Do you want to allow this app to make changes to your PC?" with "Yes" button highlighted.
2. Information dialog box: "Please close all running applications before you start the setup of Profibanka." with "OK" button highlighted.
3. Welcome to the InstallShield Wizard for Profibanka screen: "The InstallShield® Wizard will install Profibanka on your computer. To continue, click Next." with "Next" button highlighted.
4. License Agreement screen: "Do you accept all the terms of the preceding License Agreement? If you choose No, the setup will close. To install Profibanka, you must accept this agreement." with "Yes" button highlighted.
5. Information screen: "Please read the following text." with "Next" button highlighted.
6. Customer Information screen: "Please enter your information." with "Next" button highlighted.
7. Choose Destination Location screen: "Select folder where Setup will install files." with "Next" button highlighted.
8. Select Program Folder screen: "Please select a program folder." with "Next" button highlighted.

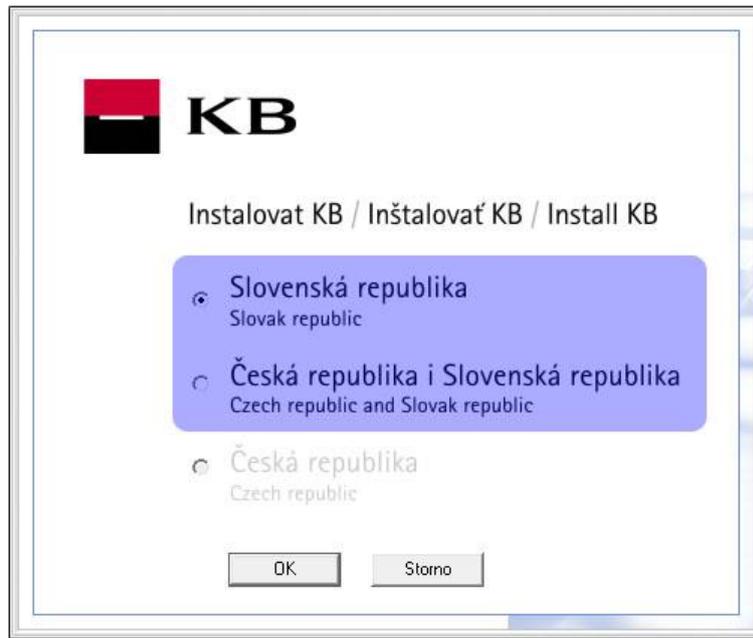

9. Activate option „Setting the application usage for group users“
10. In case of Win 10 there is an option „Install compatible components“. **This option has to be also activated.** There is only one exception: in case of you want to recover a backup of database from Profibanka with Win XP, please deactivate this option.
11. Enter the name and password for local admin user and click on button **Next**
12. Click on **Next** to start the installation which may take up a few minutes
13. At the end of installation please select **Finish**

The image displays several screenshots from the Profibanka Setup - 1.23 (R283) installation wizard, illustrating the steps outlined in the text:

- Admin user settings:** Shows the 'Admin user settings' screen where the user must enter login and password for the user Admin. The 'Setting the application usage for group Users' checkbox is checked (9). The 'Install compatible components' checkbox is also checked (10). The login and password fields are filled with 'admin' (11).
- Start Copying Files:** Shows the 'Start Copying Files' screen where the user reviews settings before copying files. The 'Next >' button is highlighted (12).
- Setup Status:** Shows the 'Setup Status' screen where the installation progress is displayed. The progress bar is at 29%. The 'Cancel' button is visible.
- InstallShield Wizard Complete:** Shows the 'InstallShield Wizard Complete' screen where the installation is finished. The 'Finish' button is highlighted (13).

### MODIFICATION FOR KB BRATISLAVA

- In case of Profibanka software will be used for KB Bratislava then in the folder with Profibanka installation find a file **setupBank.exe** and open it:

- If you choose „Slovak republic“ then Profibanka will be available only for clients of KB Bratislava
- In case of „Czech and Slovak republic“ selection, Profibanka creates 2 desktop icons – one for CZK customers and one for SVK customers.

### RUNNING PROFIBANKA ON WINDOWS SERVER

#### Operating system Windows Server is not supported !

But according to our experience the Profibanka is functional under Win Server.

The problem is that terminal server allows login multiple users in the same time which may cause the inconsistency in the Profibanka´s database. Because of that we strongly recommend you to download and install this patch:

[https://www.mojebanka.cz/file/u/pcb/patch\\_terminalServer\\_multiuser.exe](https://www.mojebanka.cz/file/u/pcb/patch_terminalServer_multiuser.exe)

This patch will modify Profibanka software so it will not allow to login multiple users at the same time.

## SMARTCARD READER INSTALLATION

Installation packages for smartcard readers could be found in stallation folder of Profibanka in subfolders: \CryptoPlus\exe\. Name of installation file should match with name of reader (please check the list of readers below). Once you find the right installation file, please open it to start the installation.

			
<p>GemPlus Gem PC Twin USB</p> <p>KBinst2.1.8.16111_GemPC_Twin_USB.exe</p>	<p>Gemalto ID Bridge CT170</p> <p>KBinst2.1.8.16111_IDBridgeCT710.exe</p>	<p>Omnikey Cardman 3621</p> <p>KBinst2.1.8.16111_CardMan3x21.exe</p>	<p>Omnikey Cardman 3821</p> <p>KBinst2.1.8.16111_CardMan3x21.exe</p>
			
	<p>ID Bridge CT510 (Expres Card 54)</p> <p>KBinst2.1.8.16111_IDBridgeCT710.exe</p>	<p>Omnikey Cardman 4040</p> <p>KBinst2.1.8.16111_CardMan4040.exe</p>	

1. In the first step please click on **Continue**
2. Admin rights are required. In case of „User account control“ message please click on Yes button.
3. Enter PIN and click on **Login**. In case of using Pinpad reader please enter PIN directly on reader´s keyboard and confirm it with green button.
4. Confirm it with **OK**
5. Click on **Close** to finish the installation

The image illustrates the installation process for Profibanka, showing the following steps:

1. The **Installation wizard** window is displayed, and the **Continue** button is highlighted.
2. A **User Account Control** dialog box appears, asking for permission to allow the program to make changes to the computer. The **Yes** button is highlighted.
3. The **CryptoPlus** login screen is shown. The **Login** button is highlighted (3a), and the **Enter PIN on PINpad reader** button is highlighted (3b). A smartcard reader is shown next to the PINpad reader.
4. A message box indicates that the installation wizard has completed the test successfully. The **OK** button is highlighted.
5. The **Installation wizard** window is shown again, and the **Close** button is highlighted.

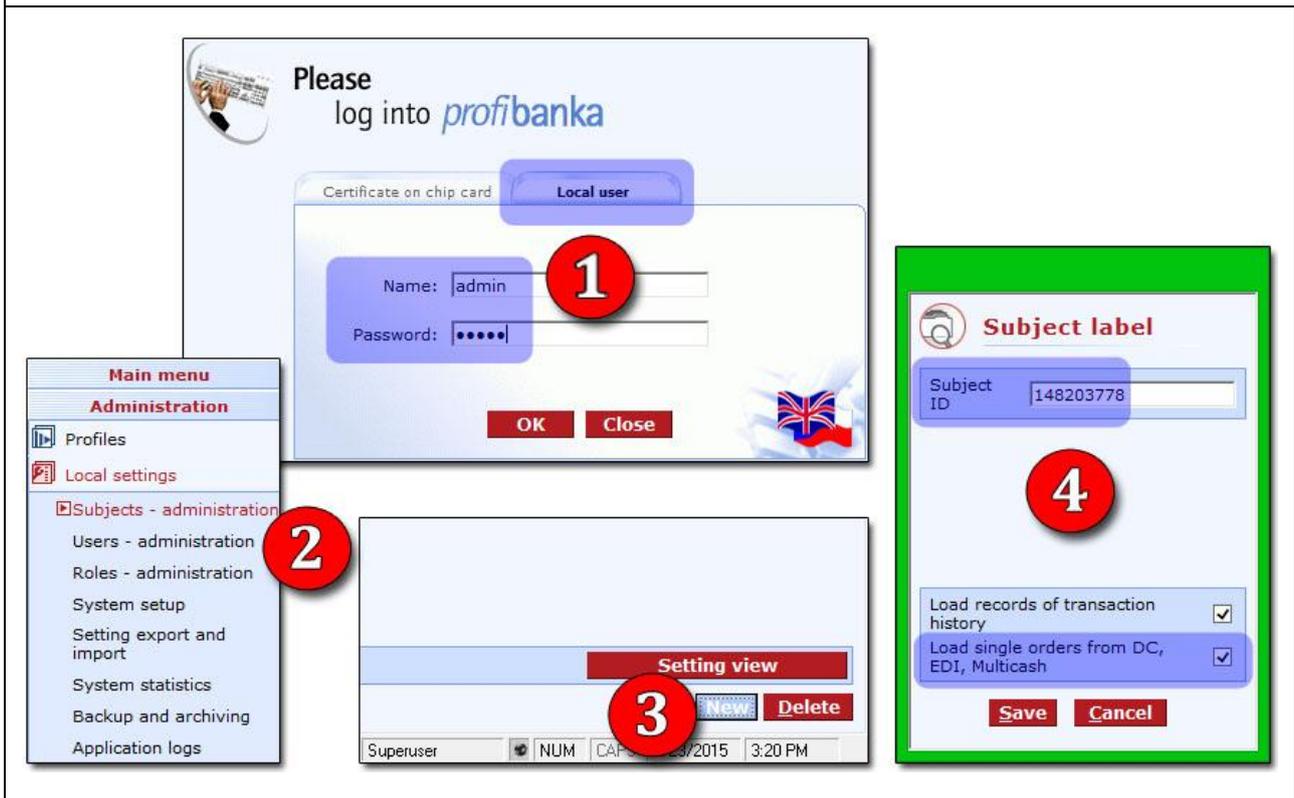

## INICIALIZATION

### ENTERING THE SUBJECT (COMPANY) INTO THE DATABASE

1. Please login as a **Local User** (name and password was chosen at the beginning of installation)
2. Go to sections **Administration / Local settings / Subject administration**
3. choose **New** in the right down corner of the screen
4. enter client's identification number from your contract for using the internet banking and click on button **Save**.

If you also use Direct channel and/or Multicash software, please activate option: **Load single orders from DC, EDI, Multicash.**

The screenshot illustrates the installation process with four numbered steps:

- 1:** Login screen titled "Please log into profibanka". It shows a "Local user" selection and a login form with "Name: admin" and "Password: [masked]".
- 2:** The "Main menu" is shown, with "Administration" expanded to "Local settings" and "Subjects - administration".
- 3:** The "Setting view" window is displayed, showing a "New" button in the bottom right corner.
- 4:** The "Subject label" window is shown, with the "Subject ID" field containing "148203778". It includes checkboxes for "Load records of transaction history" and "Load single orders from DC, EDI, Multicash", both of which are checked.

## ENTERING THE GLOBAL USER (SMARTCARD USER) INTO THE DATABASE

1. Go to sections **Administration / Local settings / Users administration**
2. choose **New** in the right down corner of the screen
3. activate option „**Global**“, enter the smartcard into the reader and click on **Load ID from certificate** Afterwards click on button **Save**
4. close the Profibanka and start it again. Try to login using the certificate on smartcard and activate option „Download upon login“.

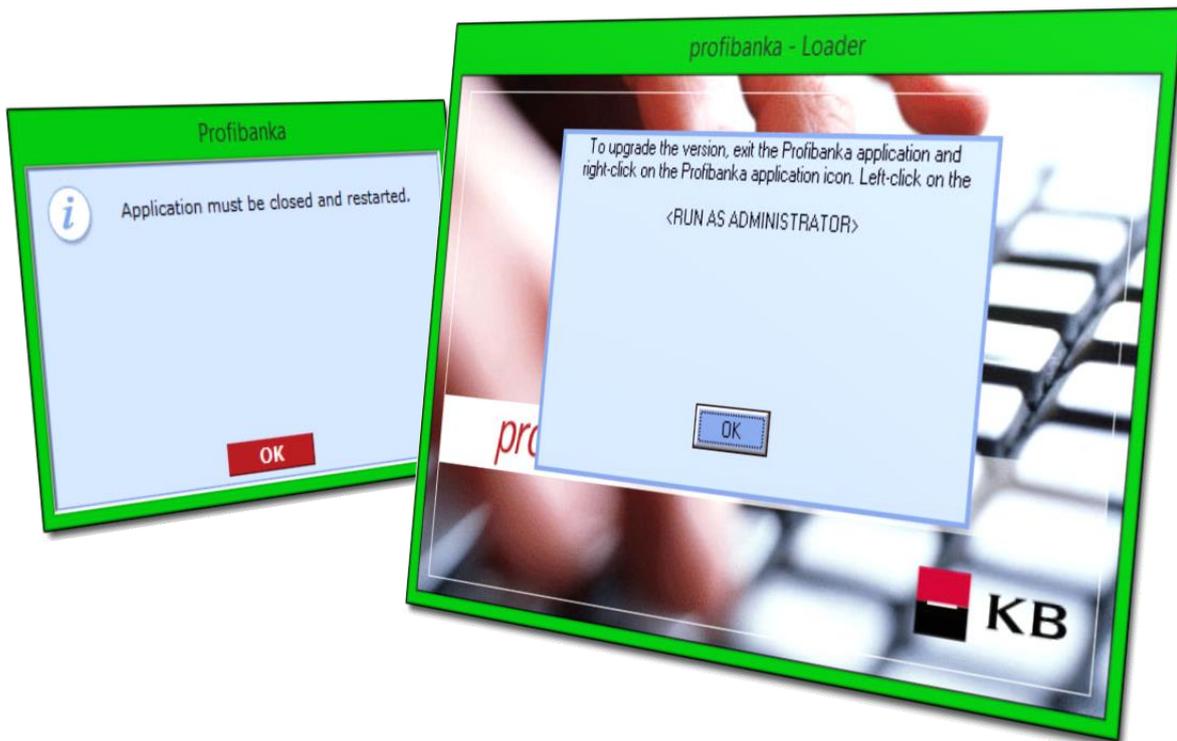

The image displays three screenshots from the Profibanka administration interface, illustrating the steps to add a global user:

- Step 1:** The 'Main menu' is shown with 'Administration' selected. Under 'Administration', 'Local settings' is chosen, and then 'Users - administration' is highlighted. A red circle with the number '1' is placed over the 'Users - administration' menu item.
- Step 2:** The 'Users administration' screen is shown. A red circle with the number '2' is placed over the 'New' button in the bottom right corner.
- Step 3:** The 'User label' configuration screen is shown. The 'Global' checkbox is checked. The 'Certificate ID' field contains '148203779'. A red circle with the number '3' is placed over the 'Load ID from certificate' button. The 'Save' button is also visible.
- Step 4:** The login screen is shown. The 'Certificate on chip card' option is selected. A red circle with the number '4' is placed over the 'Download upon login' checkbox, which is checked. The 'OK' button is also visible.

## DOWNLOADING

When you try to login into Profibanka as smartcard user for the first time, most likely an upgrade of Profibanka will be required. In that case you will have to close the application and start it again as the administrator of computer.

To do that please make a right click of your mouse on the icon of Profibanka and select option „**Run as administrator**“ and if user account control appears, please click on **YES** button.
